

Dolly

Speed 6 m / s

Flight range 100m x 100m

Remote Head Newton Gyro Stabilized Head

Certified according to BGV-C1 (DGUV)

4-point rope system with low sag and stabilized 3-axis remote head.

The Spidercam light is now available exclusively at ACE. This "little sister" of the well-known Spidercam 250 is a complete new development, designed by the manufacturer especially for use in studios. A smaller Dolly with stabilized Newton Remote Head, smaller winds and a slew of only 5 ° allow the use of this new 4-point rope system, even in flat studios. This makes the Spidercam light an ideal partner for TV shows, concerts and events, where the use of the conventional Spidercam is not possible due to a low ceiling or other structural obstacles.

Also attractive is the more favorable daily rent, which is about a third less than the SC250.
